Problem and objectives

The problem

Tourists face unclear pricing, slow paperwork, rigid cancellation and little help when a vehicle breaks down.

Our objectives

One place to compare vehicles, see the full cost upfront, book in minutes and cancel without friction.

Who it serves

Weekend riders, family travellers, daily commuters and foreign visitors with an International Driving Permit.

A ride for every kind of trip

Under 6 hours or no-show

Refunds in 3–5 working days · Free one-time reschedule up to 12 hours before pickup

Rider stories

Aarav M. · Weekend rider

Bike was waiting at the airport, spotless, and returning it took two minutes.

Sophie L. · Traveller

Plans changed last minute and the refund came without any back and forth.

Nikhil R. · Commuter

Weekly rental for work. Cheaper than cabs and I choose my own schedule.

How it is built

Front end

HTML, CSS and JavaScript. Responsive, mobile-first, with a light and dark theme.

Booking logic

Calculator, trip planner and refund estimator run in the browser. Bookings are saved locally for the demo.

Hosting

Static site on GitHub Pages, so it loads fast and is free to host.

Team names and roles: [add here]

Next steps

Backend and accounts

Real user accounts, a database for bookings and live vehicle availability.

Payments and alerts

Online payment for the advance, plus real SMS and email confirmations.

Partner hubs

A hub dashboard, one-way rentals and GPS tracking across more cities.
